Food Regulatory

Prot. N° 01/2008

Food Regulatory Approvals

With respect to EU

The following Regulations and Directives are applied:

European Directive 2002/72/EEC of August 06, 2002 relating to Plastics Materials and Articles intended to come in Contact with Foodstuffs and further amendments, and CE Regulation n° 1935/2004.

A. PVC Hoses

This product serie includes the following hoses:

Arianna TA
Bacco
Cristallo
Nettuno
Plutone
Plutone A
Plutone PR

gumex

The hose wall can come in contact with the transported media according to the following:

- The above-mentioned hoses can be used with foodstuffs that belong to the classes "A" (water-based foodstuffs), "B" (acidic-water-based foodstuffs) and "C" (water-based foodstuffs with a maximum ethyl alcohol content of 15%, for Bacco the limit is 30%).
- The above-mentioned hoses can not be used with foodstuffs that belong to the class "D" (fatty foodstuffs).
- The above-mentioned hoses can be used in contact with the so-called *dry foodstuffs*, for which no migration tests with simulants are prescribed.

B. TPV Thermoplastic rubber hoses

This product serie includes the following hose:

Plutone PF

The hose wall can come in contact with the transported media according to the following:

- The above-mentioned hose can be used with foodstuffs that belong to the classes "A" (water-based foodstuffs), "B" (acidic-water-based foodstuffs) and "C" (water-based foodstuffs with a maximum ethyl alcohol content of 50%).
- The above-mentioned hose can not be used with foodstuffs that belong to the class "D" (fatty foodstuffs).
- The above-mentioned hose can be used in contact with the so-called *dry foodstuffs*, for which no migration tests with simulants are prescribed.

C. PVC/PU hoses

This product serie includes the following hoses:

Gemini 2
Nettuno PU
Urano PU
Zeus PU

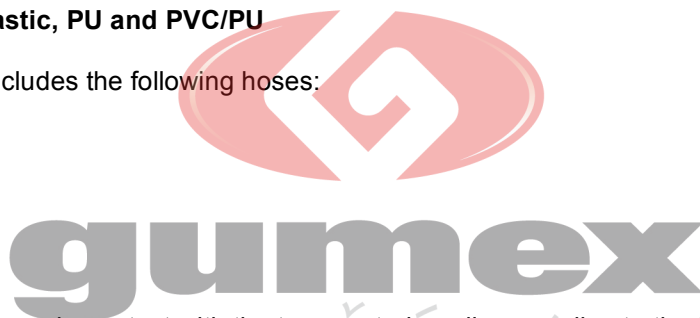

The the hose wall can come in contact with the transported media according to the following:

- The above-mentioned hoses can be used with foodstuffs that belong to the classes "A" (water-based foodstuffs), "B" (acidic-water-based foodstuffs) and "C" (water-based foodstuffs with a maximum ethyl alcohol content of 15%) and "D" (fatty foodstuffs).
- The above-mentioned hoses can be used in contact with the so-called *dry foodstuffs*, for which no migration tests with simulants are prescribed.

D. Hoses in thermoplastic, PU and PVC/PU

This product serie includes the following hoses:

Vulcano PU-Z
Vulcano PU-R
Vulcano 07
Eolo PU
Eolo PU-P

The hose wall can come in contact with the transported media according to the following:

- The above-mentioned hoses can be used in contact with the so-called *dry foodstuffs*, for which no migration tests with simulants are prescribed.

We want to call your attention to the fact that, according to the law, the final user is responsible to check the technological suitability for the intended purpose.

The migration tests are carried out using the so-called simulants for foodstuffs and some test procedures that, according to the normative (Chapter I, Table 1 and Section 2.1, Chapter II, Table 3 and Section 1 of the enclosure in the EU Directive EEC/97/48) are referred to the expected or normal contact conditions for the hoses.

The specifications and the mentioned regulations should be consulted in order to achieve all the inherent details.
